

## Compile Mode

Control/DCD Release 2.4 enhances the standard IBM Compiler Listing by adding new COBOL diagnostics that increase a programmer's productivity.

Control/DCD produces the Alternate Compile Listing (ACL) which precedes the compiler's diagnostics. The source code comes with enhanced diagnostics in Narrative form.

This Narrative is a more cost effective output for documenting and enhancing a COBOL program. Additionally, the Narrative is a more cost effective method for migration to the new Enterprise Compilers.

Control/DCD provides:

- Hierarchical notation on program flow, data field narratives,
- Perform errors, unused code, unused 01 records and copy-books,
- Invalid Data detection. Call parameter errors. Occurs clause errors. Perform errors, and much more.

Control/DCD is executed via JCL so the programmer sets the job up once and submits the work for batch execution.

Contact Marble Computer today for a free no obligation evaluation of Control/DCD.

# Fact Sheet

## Control/DCD

### Did you know.....

Marble Computer has been in business since 1983.

Our primary product Control/DCD helps major corporations manage their mission critical applications 24x7.

Control/DCD helps our customers migrate to IBM compilers 6.2 or 6.3.

Control/DCD provides output in .pdf format.

Marble Computer software products are z/15 compliant, support z/OS V2.4 and COBOL Version 6.2 & 6.3.
